CHAPTER 16

Social Psychology

CHAPTER OVERVIEW

Chapter 16 demonstrates the powerful influences of social situations on the behavior of individuals. Central to this topic are research studies on attitudes and actions, conformity, compliance, and group and cultural influences. The social principles that emerge will help us to understand how individuals are influenced by advertising, political candidates, and the various groups to which they belong. Although social influences are powerful, it is important to remember the significant role of individuals in choosing and creating the social situations that influence them.

The chapter also discusses how people relate to one another, from the negative—developing prejudice and behaving aggressively—to the positive—being attracted to people who are nearby and/or similar and behaving altruistically.

The chapter concludes with a discussion of situations that provoke conflict and techniques that have been shown to promote conflict resolution.

Although there is some terminology for you to learn in this chapter, your primary task is to absorb the findings of the many research studies discussed. The chapter headings, which organize the findings, should prove especially useful to you here. In addition, you might, for each main topic (conformity, group influence, aggression, etc.), ask yourself the question, “What situational factors promote this phenomenon?” The research findings can then form the basis for your answers.

NOTE: Answer guidelines for all Chapter 16 questions begin on page 396.

CHAPTER REVIEW

First, skim each section, noting headings and boldface items. After you have read the section, review each objective by answering the fill-in and essay-type questions that follow it. As you proceed, evaluate your performance by consulting the answers beginning on page 396. Do not continue with the next section until you understand each answer. If you need to, review or reread the section in the textbook before continuing.

Social Thinking (pp. 673–679)

Objective 1: Describe the three main focuses of social psychology, and explain how the fundamental attribution error affects our judgments of others.

1. Psychologists who study how we think about, influence, and relate to one another are called

   _____________________________.

2. Heider’s theory of how we explain others’ behavior is the ____________________ theory.
   According to this theory, we attribute behavior either to an internal cause, which is called a
   _________________________
   or to an external cause, which is called a
   _________________________

3. Most people tend to__________________ (overestimate/underestimate) the extent to which people’s actions are influenced by social situations because their ____________________ is focused on the person. This tendency is called the
   _________________________. When explaining our own behavior, or that of someone we know well, this tendency is ____________________ (stronger/weaker). When observers view the world from others’ perspectives, attributions are
   _________________________. (the same/reversed).
Give an example of the practical consequences of attributions.

**Objective 2:** Define attitude, and explain how attitudes and actions affect each other.

4. Feelings, often based on our beliefs, that predispose our responses are called _______________. When people focus on an issue and respond favorably to an argument, _______________ has occurred. Persuasion may also occur through the _______________ (slower/faster) _______________ as people respond to incidental cues such as a speaker's appearance.

5. Many research studies demonstrate that our attitudes are strongly influenced by _______________. One example of this is the tendency for people who agree to a small request to comply later with a larger one. This is the _______________ phenomenon.

6. When you follow the social prescriptions for how you should act, say, a college student, you are adopting a _______________.

7. Taking on a set of behaviors, or acting in a certain way, generally _______________ (changes/does not change) people’s attitudes.

8. According to _______________ theory, thoughts and feelings change because people are motivated to justify actions that would otherwise seem hypocritical. This theory was proposed by _______________

9. Dissonance theory predicts that people induced (without coercion) to behave contrary to their true attitudes will be motivated to reduce the resulting _______________ by changing their _______________.

**Social Influence** (pp. 680–691)

**Objective 3:** Describe the chameleonic effect, and discuss Asch's experiments on conformity, noting the difference between normative and informational social influence.

1. The **chameleonic effect** refers to our natural tendency to unconsciously _______________ others' expressions, postures, and voice tones. This helps us to feel what they are feeling, referred to as _______________.

2. Copycat violence is a serious example of the effects of _______________ on behavior.

3. Sociologists have found that suicides sometimes increase following a _______________ suicide.

4. The term that refers to the tendency to adjust one's behavior to coincide with an assumed group standard is _______________.

5. The psychologist who first studied the effects of group pressure on conformity is _______________.

6. In this study, when the opinion of other group members was contradicted by objective evidence, research participants _______________ (were/were not) willing to conform to the group opinion.

7. One reason that people comply with social pressure is to gain approval or avoid rejection; this is called _______________.

   Understood rules for accepted and expected behavior are called social _______________.

8. Another reason people comply is that they have genuinely been influenced by what they have learned from others; this type of influence is called _______________.
Objective 4: Describe Milgram’s experiments on obedience, and explain how the conformity and obedience studies can help us understand our susceptibility to social influence.

9. The classic social psychology studies of obedience were conducted by ___________________. When ordered by the experimenter to electrically shock the “learner,” the majority of participants (the “teachers”) in these studies _______________(complied/refused). More recent studies have found that women’s compliance rates in similar situations were _______________(higher than/lower than/similar to) men’s.

List the conditions under which obedience was highest in Milgram’s studies.

10. In getting people to administer increasingly larger shocks, Milgram was in effect applying the __________________________ technique.

11. The Asch and Milgram studies demonstrate that strong _______________ influences can make _______________ people _______________ to falsehoods and _______________ orders to commit cruel acts.

Objective 5: Describe conditions in which the presence of others is likely to result in social facilitation, social loafing, or deindividuation.

12. The tendency to perform a task better when other people are present is called __________________________. In general, people become aroused in the presence of others, and arousal enhances the correct response on a(n) _______________ (easy/difficult) task. Later research revealed that arousal strengthens the response that is most _______________ in a given situation.

13. Researchers have found that the reactions of people in crowded situations are often _______________ (lessened/amplified).

14. Ingham found that people worked _______________ (harder/less hard) in a team tug-of-war than they had in an individual contest. This phenomenon has been called __________________________.

15. The feeling of anonymity and loss of self-restraint that an individual may develop when in a group is called __________________________.

Objective 6: Discuss how group interaction can facilitate group polarization and groupthink, and identify the characteristic common to minority positions that successfully sway majorities.

16. Over time, the initial differences between groups usually _______________ (increase/decrease).

17. The enhancement of each group’s prevailing tendency over time is called __________________________. Electronic discussions on the _______________ provide a medium for this tendency.

18. When the desire for group harmony overrides realistic thinking in individuals, the phenomenon known as _______________ has occurred.

19. In considering the power of social influence, we cannot overlook the interaction of __________________________ (the power of the situation) and __________________________ (the power of the individual).

20. The power of one or two individuals to sway the opinion of the majority is called __________________________.

21. A minority opinion will have the most success in swaying the majority if it takes a stance that is _______________ (unswerving/flexible).
**Social Relations (pp. 691–719)**

**Objective 7:** Identify the three components of prejudice, and contrast overt and subtle forms of prejudice.

1. Prejudice is an ________________ (and usually ________________) attitude toward a group that involves overgeneralized beliefs known as ________________.

2. Like all attitudes, prejudice is a mixture of ________________, ________________, and predispositions to ________________.

3. Prejudice is a negative ________________, and ________________ is a negative ________________.

4. Americans today express ________________, (less/the same/more) racial and gender prejudice than they did 50 years ago.

5. (text and Close-Up) Blatant forms of prejudice ________________ (have/have not) diminished. However, even people who deny holding prejudiced attitudes may carry negative ________________ about race.

6. (Close-Up) Studies of prejudice indicate that it is often an unconscious, or ________________, action. Several studies have shown that the more a person's features are perceived as typical of their ________________, the more likely they are to elicit ________________ responding.

7. (Close-Up) Today's biopsychosocial approach has stimulated neuroscience studies that have detected implicit prejudice in people's ________________-muscle responses and in the activation of their brain's ________________.

8. Worldwide, ________________ (women/men) are more likely to live in poverty. People tend to perceive women as being more ________________ and ________________ and less ________________ than men.

**Objective 8:** Discuss the social factors that contribute to prejudice, and explain how scapegoating illustrates the emotional component of prejudice.

9. For those with money, power, and prestige, prejudice often serves as a means of ________________ social inequalities.

10. Discrimination increases prejudice through the tendency of people to ________________ victims for their plight.

11. Through our ________________, ________________, we associate ourselves with certain groups.

12. Prejudice is also fostered by the ________________, a tendency to favor groups to which one belongs—called the ________________—while excluding others, or the ________________.

13. Research studies also reveal that the terror of facing ________________ tends to heighten patriotism and produce loathing and aggression toward people who threaten one's ________________.

14. That prejudice derives from attempts to blame others for one's frustration is proposed by the ________________ theory.

15. People who feel loved and supported become more ________________ to and ________________ of those who differ from them.

**Objective 9:** Cite four ways that cognitive processes help create and maintain prejudice.

16. Research suggests that prejudice may also derive from ________________, the process by which we attempt to simplify our world by classifying people into groups. One by-product of this process is that people tend to ________________ the similarity of those within a group. One manifestation of this is the ________________, the tendency to recall faces of one's own race more accurately than those of other races.
17. Another factor that fosters the formation of group stereotypes and prejudice is the tendency to
__________ from vivid or memorable cases.

18. The belief that people get what they deserve—that the good are rewarded and the bad punished—is expressed in the ____________ phenomenon. This phenomenon is based in part on ____________, the tendency to believe that one would have foreseen how something turned out.

Objective 10: Explain how psychology's definition of aggression differs from everyday usage, and describe various biological influences on aggression.

19. Aggressive behavior is defined by psychologists as ____________. Thus, psychologists ____________ (do/do not) consider assertive salespeople to be aggressive.

20. Like other behaviors, aggression emerges from the interaction of ____________ and ____________.

21. Today, most psychologists ____________ (do/do not) consider human aggression to be instinctive.

22. In humans, aggressiveness ____________ (varies/does not vary) greatly from culture to culture, era to era, and person to person.

23. That there are genetic influences on aggression can be shown by the fact that many species of animals have been ____________ for aggressiveness.

24. Twin studies suggest that genes ____________ (do/do not) influence human aggression. One genetic marker of those who commit the most violence is the ____________ chromosome. Studies of violent criminals reveal diminished activity in the brain's ____________, which play an important role in controlling ____________.

25. In humans and animals, aggression is facilitated by ____________ systems, which are in turn influenced by ____________, alcohol, and other substances in the blood.

26. The aggressive behavior of animals can be manipulated by altering the levels of the hormone ____________. When this level is ____________ (increased/decreased), aggressive tendencies are reduced.

27. High levels of testosterone correlate with ____________, low tolerance for ____________, and ____________. Among teenage boys and adult men, high testosterone also correlates with ____________, hard ____________, and aggressive-bullying responses to ____________. With age, testosterone levels—and aggressiveness— ____________ (increase/decrease). Although testosterone heightens aggressiveness, aggression ____________ (increases/decreases) testosterone level.

28. One drug that unleashes aggressive responses to provocation is ____________.

Objective 11: Outline psychological and social-cultural triggers of aggression, noting the relationship between violent video games and aggressive behavior.

29. According to the ____________ principle, inability to achieve a goal leads to anger, which may generate aggression.

30. Other aversive stimuli can provoke hostility, including ____________.

31. Aggressive behavior can be learned through ____________, as shown by the fact that people use aggression where they’ve found it pays, and through ____________ of others.

32. Crime rates are higher in countries in which there is a large disparity between those who are ____________ and those who are ____________. High violence rates also
are typical of cultures and families in which there is minimal ____________________________

33. Once established, aggressive behavior patterns are ____________________________ (difficult/not difficult) to change. However, ____________________________ programs have been successful in bringing down re-arrest rates of juvenile offenders and gang members.

34. Violence on television tends to ____________________________ people to cruelty and ____________________________ them to respond aggressively when they are provoked.

35. The “rape myth” is the mistaken idea that ____________________________ . Most rapists ____________________________ (accept/do not accept) this myth.

Comment on the impression of women that pornography frequently conveys and the effects this impression has on attitudes and behavior.

36. Experiments have shown that, among other factors, depictions by the media of ____________________________ most directly affect men’s acceptance and performance of aggression against women. Such depictions may create ____________________________ to which people respond when they are in new situations or are uncertain how to act.

37. Kids who play a lot of violent video games see the world as more ____________________________ , get into more ____________________________ and ____________________________ , and get worse ____________________________ .

38. Research studies of the impact of violent video games ____________________________ (confirm/disconfirm) the idea that we feel better if we “blow off steam” by venting our emotions. This idea is the ____________________________ ____________________________ . Expressing anger breeds ____________________________ (more/less) anger.

39. Many factors contribute to aggression, including ____________________________ factors, such as an increase in testosterone; ____________________________ factors, such as frustration; and ____________________________ factors, such as deindividuation.

Objective 12: Describe the influence of proximity, physical attractiveness, and similarity on interpersonal attraction.

40. A prerequisite for, and perhaps the most powerful predictor of, attraction is ____________________________ .

41. When people are repeatedly exposed to unfamiliar stimuli, their liking of the stimuli ____________________________ (increases/decreases). This phenomenon is the ____________________________ effect. Robert Zajonc contends that this phenomenon was ____________________________ for our ancestors, for whom the unfamiliar was often dangerous. One implication of this is that ____________________________ against those who are culturally different may be a primitive, ____________________________ emotional response.

42. Our first impression of another person is most influenced by the person’s ____________________________ .

43. In a sentence, list several of the characteristics that physically attractive people are judged to possess: ____________________________ .

44. A person’s attractiveness ____________________________ (is/is not) strongly related to his or her self-esteem or happiness.
45. Cross-cultural research reveals that men judge women as more attractive if they have a ________________ appearance, whereas women judge men who appear ________________, as more attractive. People also seem to prefer physical features that are neither unusually ________________ nor _________________. Average faces, which tend to be ________________, are judged to be more sexually attractive.

46. Compared with strangers, friends and couples are more likely to be similar in terms of ________________.

Explain what a reward theory of attraction is and how it can account for the three predictors of liking—proximity, attractiveness, and similarity.

Objective 13: Describe the effect of physical arousal on passionate love, and identify two predictors of enduring companionate love.

47. Hatfield has distinguished two types of love: ________________ love and ________________ love.

48. According to the two-factor theory, emotions have two components: physical ________________ and a ________________ label.

49. When college men were placed in an aroused state, their feelings toward an attractive woman ________________ (were/were not) more positive than those of men who had not been aroused.

50. Companionate love is promoted by ________________—mutual sharing and giving by both partners. Another key ingredient of loving relationships is the revealing of intimate aspects of ourselves through ________________.

Objective 14: Define altruism, and describe the steps in the decision-making process involved in bystander intervention.

51. An unselfish regard for the welfare of others is called ________________.

Give an example of altruism.

52. According to Darley and Latané, people will help only if a three-stage decision-making process is completed: Bystanders must first ________________ the incident, then ________________ it as an emergency, and finally ________________ for helping.

53. When people who overheard a seizure victim calling for help thought others were hearing the same plea, they were ________________ (more/less) likely to go to his aid than when they thought no one else was aware of the emergency.

54. In a series of staged accidents, Latané and Darley found that a bystander was ________________ (more/less) likely to help if other bystanders were present. This phenomenon has been called the ________________ ________________.

Identify the circumstances in which a person is most likely to offer help during an emergency.
Objective 15: Explain altruism from the perspectives of social exchange theory and social norms.

55. The idea that social behavior aims to maximize rewards and minimize costs is proposed by

______________ theory.

56. One rule of social behavior tells us to return help to those who have helped us; this is the

______________ norm.

57. Another rule tells us to help those who need our help; this is the

______________ norm.

Objective 16: Explain how social traps and mirror-image perceptions fuel social conflict, and discuss effective ways of encouraging peaceful cooperation and reducing conflict.

58. A perceived incompatibility of actions, goals, or ideas is called ________________. This perception can take place between individuals, ________________, or ________________.

59. Situations in which conflicting parties become caught in mutually destructive behavior by pursuing their own self-interests are called

______________.

60. The distorted images people in conflict form of each other are called ________________ perceptions.

61. In most situations, establishing contact between two conflicting groups ________________ (is/is not) sufficient to resolve conflict.

62. In Sherif’s study, two conflicting groups of campers were able to resolve their conflicts by working together on projects in which they shared ________________ goals. Shared ________________ breed solidarity, as demonstrated by a surge in use of the word ________________ in the weeks after 9/11.

63. When conflicts arise, a third-party ________________ may facilitate communication and promote understanding.

64. Osgood has advanced a strategy of conciliation called GRIT, which stands for ________________ and ________________ in ________________.

______________ The key to this method is each side’s offering of a small__

______________ gesture in order to increase mutual trust and cooperation.

PROGRESS TEST 1

Multiple-Choice Questions

Circle your answers to the following questions and check them with the answers beginning on page 398. If your answer is incorrect, read the explanation for why it is incorrect and then consult the appropriate pages of the text (in parentheses following the correct answer).

1. In his study of obedience, Stanley Milgram found that the majority of subjects
   a. refused to shock the learner even once.
   b. complied with the experiment until the “learner” first indicated pain.
   c. complied with the experiment until the “learner” began screaming in agony.
   d. complied with all the demands of the experiment.

2. According to cognitive dissonance theory, dissonance is most likely to occur when
   a. a person’s behavior is not based on strongly held attitudes.
   b. two people have conflicting attitudes and find themselves in disagreement.
   c. an individual does something that is personally disagreeable.
   d. an individual is coerced into doing something that he or she does not want to do.

3. Which of the following statements is true?
   a. Groups are almost never swayed by minority opinions.
   b. Group polarization is most likely to occur when group members frequently disagree with one another.
   c. Groupthink provides the consensus needed for effective decision making.
   d. A group that is like-minded will probably not change its opinions through discussion.

4. Conformity increased under which of the following conditions in Asch’s studies of conformity?
   a. The group had three or more people.
   b. The group had high status.
   c. Individuals were made to feel insecure.
   d. All of these conditions increased conformity.
5. Violent criminals often have diminished activity in the ______ of the brain, which play(s) an important role in ______.
   a. occipital lobes; aggression
   b. hypothalamus; hostility
   c. frontal lobes; controlling impulses
   d. temporal lobes; patience

6. The phenomenon in which individuals lose their identity and relinquish normal restraints when they are part of a group is called
   a. groupthink.                c. empathy.
   b. cognitive dissonance.     d. déindividuation.

7. Subjects in Asch’s line-judgment experiment conformed to the group standard when their judgments were observed by others but not when they were made in private. This tendency to conform in public demonstrates
   a. social facilitation.
   b. overjustification.
   c. informational social influence.
   d. normative social influence.

8. Based on findings from Milgram’s obedience studies, participants would be less likely to follow the experimenter’s orders when
   a. they hear the “learner” cry out in pain.
   b. they merely administer the test while someone else delivers the shocks.
   c. the “learner” is an older person or mentions having some physical problem.
   d. they see another subject disobey instructions.

9. Aggression is defined as behavior that
   a. hurts another person.
   b. is intended to hurt another person.
   c. is hostile, passionate, and produces physical injury.
   d. has all of these characteristics.

10. Which of the following is true about aggression?
    a. It varies too much to be instinctive in humans.
    b. It is just one instinct among many.
    c. It is instinctive but shaped by learning.
    d. It is the most important human instinct.

11. Research studies have found a positive correlation between aggressive tendencies in animals and levels of the hormone
    a. estrogen.               c. noradrenaline.
    b. adrenaline.            d. testosterone.

12. Research studies have indicated that the tendency of viewers to misperceive normal sexuality, de-value their partners, and trivialize rape is
   a. increased by exposure to pornography.
   b. not changed after exposure to pornography.
   c. decreased in men by exposure to pornography.
   d. decreased in both men and women by exposure to pornography.

13. Increasing the number of people that are present during an emergency tends to
   a. increase the likelihood that people will cooperate in rendering assistance.
   b. decrease the empathy that people feel for the victim.
   c. increase the role that social norms governing helping will play.
   d. decrease the likelihood that anyone will help.

14. Which of the following was NOT mentioned in the text discussion of the roots of prejudice?
    a. people’s tendency to overestimate the similarity of people within groups.
    b. people’s tendency to assume that exceptional, or especially memorable, individuals are unlike the majority of members of a group.
    c. people’s tendency to assume that the world is just and that people get what they deserve.
    d. people’s tendency to discriminate against those they view as “outsiders”

15. The mere exposure effect demonstrates that
    a. familiarity breeds contempt.
    b. opposites attract.
    c. birds of a feather flock together.
    d. familiarity breeds fondness.

16. In one experiment, college men were physically aroused and then introduced to an attractive woman. Compared with men who had not been aroused, these men
    a. reported more positive feelings toward the woman.
    b. reported more negative feelings toward the woman.
    c. were ambiguous about their feelings toward the woman.
    d. were more likely to feel that the woman was “out of their league” in terms of attractiveness.
17. The deep affection that is felt in long-lasting relationships is called _____ love; this feeling is fostered in relationships in which _____.
   a. passionate; there is equity between the partners
   b. passionate; traditional roles are maintained
   c. companionate; there is equity between the partners
   d. companionate; traditional roles are maintained

18. Which of the following is associated with an increased tendency on the part of a bystander to offer help in an emergency situation?
   a. being in a good mood
   b. having recently needed help and not received it
   c. observing someone as he or she refuses to offer help
   d. being a female

Matching Items
Match each term with the appropriate definition or description.

Terms

| _____ | 1. social facilitation |
| _____ | 2. social loafing |
| _____ | 3. bystander effect |
| _____ | 4. conformity |
| _____ | 5. ingroup bias |
| _____ | 6. normative social influence |
| _____ | 7. informational social influence |
| _____ | 8. group polarization |
| _____ | 9. stereotype |
| _____ | 10. attribution |
| _____ | 11. altruism |
| _____ | 12. mere exposure effect |
| _____ | 13. central route to persuasion |

Definitions or Descriptions

| a. | a causal explanation for someone's behavior |
| b. | a generalized belief about a group of people |
| c. | people work less hard in a group |
| d. | performance is improved by an audience |
| e. | the tendency to favor one's own group |
| f. | the effect of social approval or disapproval |
| g. | adjusting one's behavior to coincide with a group standard |
| h. | group discussion enhances prevailing tendencies |
| i. | the effect of accepting others' opinions about something |
| j. | unsympathetic regard for others |
| k. | the tendency that a person is less likely to help someone in need when others are present |
| l. | the increased liking of a stimulus that results from repeated exposure to it |
| m. | responding favorably to arguments as a result of systematic thinking about an issue |
PROGRESS TEST 2

Progress Test 2 should be completed during a final chapter review. Answer the following questions after you thoroughly understand the correct answers for the section reviews and Progress Test 1.

Multiple-Choice Questions

1. (Close-Up) Which of the following is an example of implicit prejudice?
   a. Jake, who is White, gives higher evaluations to essays he believes to be written by Blacks than to White-authored essays.
   b. Carol believes that White people are arrogant.
   c. Brad earns more than Jane, despite having the same job skills, performance level, and seniority.
   d. In certain countries, women are not allowed to drive.

2. We tend to perceive the members of an ingroup as _____ and the members of an outgroup as _____.
   a. similar to one another; different from one another
   b. different from one another; similar to one another
   c. above average in ability; below average in ability
   d. below average in ability; above average in ability

3. Regarding the influence of alcohol and testosterone on aggressive behavior, which of the following is true?
   a. Consumption of alcohol increases aggressive behavior; injections of testosterone reduce aggressive behavior.
   b. Consumption of alcohol reduces aggressive behavior; injections of testosterone increase aggressive behavior.
   c. Consumption of alcohol and injections of testosterone both promote aggressive behavior.
   d. Consumption of alcohol and injections of testosterone both reduce aggressive behavior.

4. Most people prefer mirror-image photographs of their faces. This is best explained by
   a. the principle of equity.
   b. the principle of self-disclosure.
   c. the mere exposure effect.
   d. mirror-image perceptions.

5. Research studies have shown that frequent exposure to sexually explicit films
   a. makes a woman's friendliness seem more sexual.
   b. diminishes the attitude that rape is a serious crime.
   c. may lead individuals to devalue their partners.
   d. may produce all of these effects.

6. Research studies indicate that in an emergency situation, the presence of others often
   a. prevents people from even noticing the situation.
   b. prevents people from interpreting an unusual event as an emergency.
   c. prevents people from assuming responsibility for assisting.
   d. leads to all of these behaviors.

7. Two neighboring nations are each stockpiling weapons. Each sees its neighbor's actions as an act of aggression and its own actions as self-defense. Evidently, these nations are victims of
   a. prejudice.
   b. groupthink.
   c. self-serving bias.
   d. the fundamental attribution error.

8. Which of the following factors is the most powerful predictor of friendship?
   a. similarity in age
   b. common racial and religious background
   c. similarity in physical attractiveness
   d. physical proximity

9. Most researchers agree that
   a. media violence is a factor in aggression.
   b. there is a negative correlation between media violence and aggressiveness.
   c. paradoxically, watching excessive pornography ultimately diminishes an individual's aggressive tendencies.
   d. media violence is too unreal to promote aggression in viewers.

10. When male students in an experiment were told that a woman to whom they would be speaking had been instructed to act in a friendly or unfriendly way, most of them subsequently attributed her behavior to
    a. the situation.
    b. the situation and her personal disposition.
    c. her personal disposition.
    d. their own skill or lack of skill in a social situation.
11. Which of the following is true?
   a. Attitudes and actions rarely correspond.
   b. Attitudes predict behavior about half the time.
   c. Attitudes are excellent predictors of behavior.
   d. Attitudes predict behavior under certain conditions.
   c. Personal influences on behavior generally are much greater than situational influences.
   d. Situational and personal influences interact in determining our behavior.

12. People with power and status may become prejudiced because
   a. they tend to justify the social inequalities between themselves and others.
   b. those with less status and power tend to resent them.
   c. those with less status and power appear less capable.
   d. they feel proud and are boastful of their achievements.

13. Which of the following most accurately states the effects of crowding on behavior?
   a. Crowding makes people irritable.
   b. Crowding sometimes intensifies people’s reactions.
   c. Crowding promotes altruistic behavior.
   d. Crowding usually weakens the intensity of people’s reactions.

14. Research has found that for a minority to succeed in swaying a majority, the minority must
   a. make up a sizable portion of the group.
   b. express its position as consistently as possible.
   c. express its position in the most extreme terms possible.
   d. be able to convince a key majority leader.

15. Which of the following conclusions did Milgram derive from his studies of obedience?
   a. Even ordinary people, without any particular hostility, can become agents in a destructive process.
   b. Most people are able, under the proper circumstances, to suppress their natural aggressiveness.
   c. The need to be accepted by others is a powerful motivating force.
   d. He reached all of these conclusions.

16. Which of the following best summarizes the relative importance of personal control and social control of our behavior?
   a. Situational influences on behavior generally are much greater than personal influences.
   b. Situational influences on behavior generally are slightly greater than personal influences.

   True-False Items

Indicate whether each statement is true or false by placing T or F in the blank next to the item.

1. When explaining another’s behavior, we tend to underestimate situational influences.  
   ____  1. T

2. When explaining our own behavior, we tend to underestimate situational influences.  
   ____  2. F
3. An individual is more likely to conform when the rest of the group is unanimous.

4. The tendency of people to conform is influenced by the culture in which they were socialized.

5. A bystander is more likely to offer help in an emergency if other bystanders are present.

6. Counterattitudinal behavior (acting contrary to our beliefs) often leads to attitude change.

7. Human aggression is instinctual.

8. Group polarization tends to prevent groupthink from occurring.

9. Crowded conditions usually subdue people’s reactions.

10. When individuals lose their sense of identity in a group, they often become more uninhibited.

11. The peripheral route to persuasion allows for fast responding to an issue.

12. In our relations with others of similar status, we tend to give more than we receive.

PSYCHOLOGY APPLIED

Answer these questions the day before an exam as a final check on your understanding of the chapter’s terms and concepts.

Multiple-Choice Questions

1. After waiting in line for an hour to buy concert tickets, Teresa is told that the concert is sold out. In her anger she pounds her fist on the ticket counter, frightening the clerk. Teresa’s behavior is best explained by
   a. evolutionary psychology.
   b. deindividuation.
   c. reward theory.
   d. the frustration-aggression principle.

2. Before she gave a class presentation favoring gun control legislation, Wanda opposed it. Her present attitude favoring such legislation can best be explained by
   a. attribution theory.
   b. cognitive dissonance theory.
   c. reward theory.
   d. evolutionary psychology.

3. Which of the following would most likely be subject to social facilitation?
   a. proofreading a page for spelling errors
   b. typing a letter with accuracy
   c. playing a difficult piece on a musical instrument
   d. running quickly around a track

4. Jane and Sandy were best friends in their first year of university. Jane joined a sorority; Sandy didn’t. By the end of their last year, they found that they had less in common with each other than with the other members of their respective circles of friends. Which of the following phenomena most likely explains their feelings?
   a. group polarization
   b. deindividuation
   c. groupthink
   d. social facilitation

5. Which of the following strategies would be most likely to foster positive feelings between two conflicting groups?
   a. Take steps to reduce the likelihood of mirror-image perceptions.
   b. Separate the groups so that tensions diminish.
   c. Increase the amount of contact between the two conflicting groups.
   d. Have the groups work on a superordinate goal.

6. José is the one student member on his school’s board of trustees. At the board’s first meeting, José wants to disagree with the others on several issues but in each case decides to say nothing. Studies on conformity suggest all except one of the following are factors in José’s not speaking up. Which one is not a factor?
   a. The board is a large group.
   b. The board is prestigious and most of its members are well known.
   c. The board members are already aware that José and the student body disagree with them on these issues.
   d. Because this is the first meeting José has attended, he feels insecure and not fully competent.

7. Given the tendency of people to categorize information according to preformed schemas, which of the following stereotypes would Juan, a 65-year-old political liberal and fitness enthusiast, be most likely to have?
   a. “People who exercise regularly are very extraverted.”
   b. “All political liberals are advocates of a reduced defense budget.”
   c. “Young people today have no sense of responsibility.”
   d. “Older people are lazy.”
8. Ever since their cabin lost the camp softball competition, the campers have become increasingly hostile toward one camper in their cabin, blaming her for every problem in the cabin. This behavior is best explained in terms of
   a. the ingroup bias.
   b. prejudice.
   c. the scapegoat theory.
   d. catharsis.

9. Maria recently heard a speech calling for a ban on aerosol sprays that endanger the earth’s ozone layer. Maria’s subsequent decision to stop using aerosol sprays is an example of
   a. informational social influence.
   b. normative social influence.
   c. deindividuation.
   d. social facilitation.

10. Mr. and Mrs. Samuels are constantly fighting, and each perceives the other as hard-headed and insensitive. Their conflict is being fueled by
    a. self-disclosure.
    b. stereotypes.
    c. a social norm.
    d. mirror-image perceptions.

11. Which of the following situations should produce the greatest cognitive dissonance?
    a. A soldier is forced to carry out orders he finds disagreeable.
    b. A student who loves animals has to dissect a cat in order to pass biology.
    c. As part of an experiment, a subject is directed to deliver electric shocks to another person.
    d. A student volunteers to debate an issue, taking the side he personally disagrees with.

12. Professor Washington’s students did very poorly on the last exam. The tendency to make the fundamental attribution error might lead her to conclude that the class did poorly because
    a. the test was unfair.
    b. not enough time was given for students to complete the test.
    c. students were distracted by some social function on campus.
    d. students were unmotivated.

13. Students at State University are convinced that their school is better than any other; this most directly illustrates
    a. an ingroup bias.
    b. prejudice and discrimination.
    c. the scapegoat effect.
    d. the just-world phenomenon.

14. Concluding her presentation on deindividuation, Renée notes that deindividuation is less likely in situations that promote
    a. anonymity.
    b. decreased self-awareness.
    c. increased self-awareness.
    d. the fundamental attribution error.

15. Ahmed and Monique are on a blind date. Which of the following will probably be most influential in determining whether they like each other?
    a. their personalities
    b. their beliefs
    c. their social skills
    d. their physical attractiveness

16. Opening her mail, Joan discovers a romantic greeting card from her boyfriend. According to the two-factor theory, she is likely to feel the most intense romantic feelings if, prior to reading the card, she has just
    a. completed her daily run.
    b. finished reading a chapter in her psychology textbook.
    c. awakened from a nap.
    d. finished eating lunch.

17. Summarizing his report on the biology of aggression, Sam notes that
    a. biology does not significantly influence aggression.
    b. when one identical twin has a violent temperament, the other member of the twin pair rarely does.
    c. hormones and alcohol influence the neural systems that control aggression.
    d. testosterone reduces dominance behaviors in animals.

18. Having read the chapter, which of the following is best borne out by research on attraction?
    b. Opposites attract.
    c. Familiarity breeds contempt.
    d. Absence makes the heart grow fonder.

19. Alexis believes that all male athletes are self-centered and sexist. Her beliefs are an example of
    a. in-group bias.
    b. groupthink.
    c. stereotypes.
    d. the fundamental attribution error.
20. Which of the following is an example of the foot-in-the-door phenomenon?
   a. To persuade a customer to buy a product a store owner offers a small gift.
   b. After agreeing to wear a small “Enforce Recycling” lapel pin, a woman agrees to collect signatures on a petition to make recycling required by law.
   c. After offering to sell a car at a ridiculously low price, a car salesperson is forced to tell the customer the car will cost $1000 more.
   d. All of these are examples.

Essay Question

The Panhellenic Council on your campus has asked you to make a presentation on the topic “Social Psychology” to all freshmen who have signed up to “rush” a fraternity or sorority. In a fit of cynicism following your rejection last year by a prestigious fraternity or sorority, you decide to speak on the negative influences of groups on the behavior of individuals. What will you discuss? (Use the space below to list the points you want to make, and organize them. Then write the essay on a separate sheet of paper.)

KEY TERMS

Writing Definitions

Using your own words, on a separate piece of paper write a brief definition or explanation of each of the following terms.

1. social psychology
2. attribution theory
3. fundamental attribution error

5. central route to persuasion
6. peripheral route to persuasion
7. foot-in-the-door phenomenon
8. role
9. cognitive dissonance theory
10. conformity
11. normative social influence
12. informational social influence
13. social facilitation
14. social loafing
15. deindividuation
16. group polarization
17. groupthink
18. prejudice
19. stereotype
20. discrimination
21. ingroup
22. outgroup
23. ingroup bias
24. scapegoat theory
25. other-race effect
26. just-world phenomenon
27. aggression
28. frustration-aggression principle
29. mere exposure effect
30. passionate love
31. companionate love
32. equity
33. self-disclosure
34. altruism
35. bystander effect
36. social exchange theory
37. reciprocity norm
38. social-responsibility norm
39. conflict
40. social trap
41. mirror-image perceptions
42. superordinate goals
43. GRIT
